

# Hypercom T7P

Integrated Terminal & Printer

The Hypercom T7P Terminal, with its integrated, modular printer, and the ability to support draft capture, debit, credit, and proprietary card processing, is the right choice for your POS product needs, for upgrading existing authorization-only equipment, or for merchants moving to debit. Whatever your selection criteria, the T7P is a clear winner.

Regardless of your POS application, the T7P is a winner when it comes to price performance. You'll save on clerk training, telephone line costs, processing time, and settlement time; at the right price and with room in the T7P to accommodate new software functionality as it is demanded by the marketplace.

## **Ideal for Upgrades**

The Hypercom T7P is designed for upgrading authorization-only equipment and for merchants moving to data capture and debit applications. It features an integrated modular impact or quiet thermal printer.

## **Reads All Card Formats**

The T7P can read all types of credit, debit, check and charge cards and an external PIN pad can be attached for supporting cardholder entry of PIN numbers. Dedicated function keys allow one-step operation of everyday processes.

## **Additional Benefits**

Price/performance benefits of the T7P include savings on user training, reduced telephone line costs and shorter processing and settlement times. The T7P also accommodates new software applications demanded by the marketplace which can be remotely downloaded from a sophisticated Terminal Management System.
