

Nurit 8000

Wireless POS/EDC Terminal

The Handheld POS For On-the-Go Transactions

Designed primarily but not only for the delivery and restaurant market business segments, the Nurit 8000 is the smallest and most powerful internet enabled wireless handheld payment terminal sold today.

More Transactions, More Often, from More Markets

The Nurit 8000 Wireless Palmtop Solution...

- is the smallest and most flexible handheld payment terminal available
- offering the broadest range of optional features
- enabling fast, secure, error-free transactions

It's the perfect solution for...

- on-the-move retailers who bring their products and services directly to their customers (including those based, until now, on cash-only transactions)
- banks and transaction processors seeking lucrative new markets

Added - Value Advantages

The Nurit 8000 global payment platform offers a host of advantages at every stage of the transaction process, while enabling increased profits at lower operating costs.

As the ultimate Multi-Application platform, it supports

- a range of Payment and Value-Added Services, including Credit, Debit, T & E, EBT, Smart Cards, Prepaid Cards, Loyalty/Gift Cards and Proprietary Cards
- a variety of easily integrated Business Management Solutions, including inventory control, dispatch and order processing for markets such as restaurants, delivery, services, taxis, et cetera.
- Doubling as a cellular phone, it offers both voice and data transfer in real time
- The sophisticated docking station allows landline communications, charges internal & spare batteries simultaneously, and easily interfaces with external devices.
